

During the lifetime of a company there are major changes in the corporate structure, and consequently the exit and entry of new partners. Studio Santececchi accompanies clients through the process of share and equity transfer, the auditing of potential shareholders, correct heading, preemptive clauses and the evaluation of the shares themselves, up until the registration of the new company structure. Our clients can thus count on a wide-ranged assistance that accompanies them through the entire process relating to the execution of the contract.
